Nocturnal animals are
animals that prefer to come out ...
- pictures and think about which
animals are awake at night
(nocturnal). Now ask the children
to think about which of these
animals would be awake during
the daytime (diurnal). Ask the
children to sort the animal
pictures into two piles, one pile
representing animals that are
nocturnal and one pile
representing animals that are
diurnal. Tue, 17 Apr 2018

nocturnal Vs.
Diurnal Animals Siop Lesson
Plan - Quick Answer. Some
examples of diurnal animals are
humans, birds, pet dogs and cats,
squirrels, elephants, gorillas,
hawks, butterflies and honeybees.
All of these animals are
considered diurnal because they
are mainly active during the day

and asleep at night. Mon, 16 Apr

Diurnal and
Nocturnal Animals - A Teacher
of Children - When activity
patterns of an organism occur in
cycles of about twenty-four
hours, the pattern is called a
circadian rhythm. Diurnal

animals, which sleep during the
night and are active during the
day, or, conversely, nocturnal
animals, which sleep during the
day and are active at night, follow
a circadian rhythm. Sat, 14 Apr
